«Russia is to step the same way again...»

The author, who is one of the architects of the «500 Days Reform», finds that no results expected from our institutional transformations made over the 2000th could be observed. He also thinks that Russia is to experience the slow evolutionary transformations which would be accompanied with conflicts of opposites, and compromises with oppositions would be inevitable.

Strategy of National Oil Companies. Industrialization, Integration, Internationalization and Innovations

Today Russian oil companies have to be seriously concerned upon their long-term strategies as the world energy markets have dramatically changed, and Russian oil base has deteriorated fast. Thus, it may happen that the best practices of their counterparts in oil-producing countries could become rather helpful.

Grain Market Waves

This article discusses a grain market and the methods for its regulation. It focuses on the interventional procurements applied in Russia as a prevailing tool of regulation. However, the additional tools happened to be required since baking companies were not ready for the dramatic price fluctuations occurred due to the big crops of 2009 and a drought of 2010. Thus, there is a necessity to restore the institutional structures destroyed during our transition to market economy; to build an effective grain market; and to improve the tools of the government support of grain producers and their crediting.
